Treasures from Castle Jollet, III., Nov. 21.—(Special.)—

Nathan F. Leopold Jr., one of the slayers of Bobby Franks, today steps out of the shadows of the Illinois state penitentiars, where he is serving a life sentence, back into the limelight as a witness for the defense in the state of six convicts accused of killing.

To take nim with the lime was slain.

"Is Klein dead?" Leopold is said to have asked the others. When they said the deputy warden had been killed, Leopold, apparently fearing to risk another murder trial, if caught, refused to go. The six now on trial were recaptured, a seventh convict in the plot escaping.

The prosecution, which closed pressional decision, holding the duchess liable to a fine of \$5,000 if more treasures disappear from the castle.

Everything Reduced

Anniversary Sale has been an important annual bargain event-extra important, we believe, because of its closeness to the holiday season.

BUT our 88th birthday celebration, which ends Tuesday, November 30th, is the greatest shopping opportunity in all our long history. Our displays are full of the world's most desirable gifts, and the greatly reduced prices are as pleasing as the assortments are charming.

Make up your Christmas shopping list here as you leisurely stroll through the shops. Every step will bring you to surprises. Only the faintest idea of the variety and values is expressed by the examples sketched and described.

It is easy to point out the shortcomings of American civilization, but the American mind is not unaware of them and a proper sense of proportion will not the subjects. exaggerate them. Looking at American society there is much to regret, but there is far more to justify our hope and trust in the future.

THE CHANGE IN THE BRIDGE SCHEDULE.

Chicago wanted to keep its bridges closed a little nger each day than antiquated port regulations aitted, but the United States government has fused the request. The only relief granted was sion to shift the morning periods when the need not be opened. That is not much, but ething gained, at any rate. People go to work later and quit earlier than they did when the old schedule was fixed; the new one takes into count the morning but not the evening peak

We shall probably be able to get along for a time, at least, under the new regulation, provided the car ferries and sandsuckers do not abuse their vileges. If they do, it may be necessary to make further appeal to the war department to classify the traffic on the river, placing more severe limitations on the movements of this class of vessel than upon cargo ships.

STRANGE BEHAVIOR OF MUSIC LOVERS.

Music lovers in this community are a queer lot. Their conversation is always plaintive. They are tired of the old things, and the new ones, they will tell you, are presented without understanding. They will complain for five years that the only opera they can tolerate is "Pelleas," and when "Pelleas" is presented the music lovers are the empire and prospered. enspicuous by their absence.

Consider, in this connection, the Chicago Bach horus, a new organization which numbers several hundred singers. It is not the business of this epartment to my how very great are the choral vorks of J. S. Bach, nor yet how well the chorus sented them recently at Orchestra hall. INTERVENTION IN NICARAGUA.

Gen. Obregon says that Mexico has the same right to intervene in Nicaragua that the United States has. It has. But the United States has intervened at the request of a constituted government, with the intent and effect to support constituted government and to protect constitutional forms of political action. It is acting openly, officially, and responsibly. Mexican intervention has not been open, official, or responsible so far as is yet known. In Nicaragua it is charged that and the immense number of drownings Mexican influences have been active in fomenting armed revolt against the government of Nicaragua "Our Country! you can hear it often!

IT'S a real compliment, isn't it, when someone says, admiringly, "that girl knows how to walk?" It's a compliment that could be paid oftener, too, if women would always wear shoes that fitted their feet. For the well-fitting shoe is the foundation of correct posture and graceful carriage.

And because The Red Cross Shoe fits with scientific exactness, it makes graceful walking easy and natural. The secret is in the exclusive "Limit" lasts, over which all Red Cross Shoes are made.

But this shoe is as famous for its distinctive styling as for its perfect fit. Just see the lovely, new models many of them with the Arch-Tone feature at our shop devoted exclusively to The Red Cross Shoe, and the only shop within the Loop authorized to handle this nationally known footwear. A visit will prove nothing short of a revelation.

PIANOS

THE purchase of a piano is usually more of an "event" than the selection of any other household possession.

It is only practical, therefore, to rely on wise guidance in choosing. And what guidance is more dependable than the opinions of great concert pianists, operatic artists and musical directors of the last four generations?

Their outspoken praise of the Kimball is in full accord with the preferences of hundreds of thousands of families throughout the country. More Kimballs are in use on this continent than pianos of any other name.

Come and hear the Kimball. See the beautiful new come and hear the Kimball. See the beautiful new styles in grands, both large and small, reproducing grands, uprights and players. Also period models for appropriate settings. The prices, plainly marked on every instrument, are of a moderation only possible when generations of experience are combined with immense production resources. Also, the Kimball "One-Price" policy assures to every purchaser the same full, generous value.

Are You Still Living in the

TO go back to living standards of the leighties is unthinkable in this day of modern conveniences. And yet in some homes, hand regulation of the heating plant, obsolete since the middle eighties, still is tolerated.

What Is the Reason?

In most cases, simply lack of understanding. Every family wants the comfort of uniform temperature—the happiness of healthful heating-freedom from look-

ing after the heating plant—the fuel saving that results from Minneapolis automatic heat regulation.

These priceless advantages of the Minneapolis are now enjoyed by more than two million people. The Minneapolis starts their day off right - with cheery warmth, provided by clock-control which automatically raises the temperature early in the morning.

All day long - temperature at just the degree you find most comfortable. At night -automatic lowering of the temperature by means of the clock. Nobody ever touches dampers, drafts, or

valves. What a vast change from hand regulation!

Easy to Pay For On Our **Budget Plan**

This plan fits any income. Spreads the payments through the winter. Enables any family to have the Minneapolis today.

<u>අප්ප්රත්ව අවස්ථ විස්වේ වි</u> AVOID UGLY PIMPLES

A pimply face will not embarrass you much longer if you get a package of Dr. Edwards' Olive Tablets. The skin Dr. Edwards' Olive Tablets. The skin should begin to clear after you have taken the tablets a few nights.

Cleanse the blood, bowels and liver with Dr. Edwards' Olive Tablets, the successful substitute for calomel; there's no sickness or pain after taking them.

Dr. Edwards' Olive Tablets do that which calomel does, and just as effectively, but their action is gentle and safe instead of severe and irritating.

No one who takes Olive Tablets is ever cursed with a "dark brown taste," a bad breath, a dull, listless, "no good" feeling, constipation, torpid liver, bad disposition or pimply face.

Olive Tablets are a purely regetable compound mixed with olive oil; know them by their olive color.

Dr. Edwards spent years among patients afflicted with liver and bowel complaints and Olive Tablets are the immensely effective result. Take nightly for a week. See how much better you feel and look. 15c. 30c. 60.

FACTS about DIGEST Homes

There are 4,751,987 readers of The Literary
Digest divided as follows:
2,415,086 Women and Girls.
2,336,901 Men and Boys.

The number of readers per copy is determined by a direct statement from Digest subscribers in which they check the number of men and women, and boys and girls in their homes who

B 72% of all The Digest circulation is delivered to the homes of Executives in business and in the professions.

C The Digest is credited with covering 39.8% of all the families in the United States with \$10,000 incomes and over; 19% of all families with incomes of from \$5,000 to \$10,000; and 661,755 families with incomes from \$2,000 to \$5,000.

D There are 258,079 Wholesale and Retail Dealers reading The Digest, among them, for example: 43,644 Building Material Dealers and Con-

tractors.

83,047 Automotive Dealers.

63,342 Clothing, Dry Goods, House Equipment Dealers.

44,435 Grocery, Meat, Pruit, Confectionery and Milk Dealers.

19,235 Hardware, Machinery and Supply

telephone homes of this country buy two thirds of the advertised products.

Whether you are selling a steamship or railroad ticket, a vacuum cleaner or an automobile, a radio or a breakfast food, your task will be far easier and more profitable if a large part of your customers are from the established and alert homes to whom the telephone has become indispensable.

These people are the leaders, the ones who have

and steady patronage insures your market. Whatever they hear about first, the rest of the community soon learns.

It is hardly surprising—but it is certainly essential to advertisers—to know that no other great magazine in the country, fiction or otherwise, has so many telephone subscribers among its regular readers as The Literary Digest. Through this one medium, you have a direct wire to a million telephone homes.

A Million Telephone Homes in the Digest Circulation of 1,400,000

E are not stating these astonishing figures carelessly. They are based on repeated and careful tests, made over a two year period, and with every safeguard of accuracy and fairness. Complete details of the tests and how they were made are available to anyone on request.

There are certainly many thousands of alert people, regular Digest readers, who live in homes where the telephones are listed under other names—those of relatives or friends. But without counting these, we know that seven out of every ten names on The Digest subscription list are listed in the telephone directories at the same address.

These alert people read The Digest because they take an active interest in the great romance of news and facts from every part of the world. From the affairs of nations to the news of the sporting world, through every activity in science, exploration, art, religion, humor and politics, The Digest reports the intelligent opinion of the world press, opinion on both sides, gathered from more than 5,000 newspapers and periodicals.

We have used only advertising to maintain circulation and to obtain new readers. We employ no canvassers. Our advertising has been directed primarily at the telephone home and we have thus sifted from all the telephone homes the ones who respond to advertising. Our readers would not be readers to-day if they had not proved their responsiveness to printed advertising by responding to our own advertising matter.

The Digest readers are the tested best from the telephone homes—those whose alertness to new suggestions has been established. The advertiser who speaks to them through the pages of The Digest is gaining and maintaining for his product the acceptance and the good will of the most alert and influential section of the telephone market

Has Science found a super X-Ray which will kill Bacteria?

READ the authentic, undistorted report of Dr. Coolidge's development of the cathode tube, in the December issue of Scientific American

T the recent annual meeting of the Franklin Insti-A tute of Philadelphia, Dr. William David Coolidge demonstrated his invention of a powerful tube for directing cathode rays. Instantly newspapers were rife with speculation about the possibilities possessed by this super ray.

A complete, lucid and authoritative report of this discovery, with illustrations demonstrating the principle of the tube, is contained in the December issue of Scientific American.

The great advantage of this magazine for wellinformed people is that it contains exact and up-todate articles about the latest trends in every branch of science. With the latest and correct facts of these developments at your finger-tips, you can always feel assured that you are scientifically abreast with the times.

INVESTMENTS

Life Tenant; and Remainderman

You may quickly understand these terms. In establishing a trust, the "life tenant" is the person who gets the income, for life; the "remainderman" is the one who takes the estate after that.

The life tenant wants the income promptly paid, as it comes in. The remainderman wants the principal intact, when it is due him.

We protect both; if the investment is made by us, on our sole responsibility, the beneficiaries are protected with a \$2,000,000 reserve fund, set aside to secure full and prompt payment when due; both interest and principal.

Ithough the crowd was rather sail, it was apparent from the cheering and enthusiasm shown that Chicago is going to like its hockey after it arms what the game is all about. The same last night as demonstrated by the Cardinals and Geyphounds, is seen faster than advertised. Most of the Cardinal players are young and sail in speed and daring and, under the rules of their league, they can ask the most of youth and speed. At times the game was a display of mighten that is seen only on the bestell field or on the basketball sait. But there were few fouls, leagh in the final of the three periods is Detroit boys launched a daring attack in a last effort to pull the game at of the fire, that cost them two of the players, and when the last goal as counted by the Chicago boys there are only four of the six regular players of the Detroit team left on the ice is fight.

Naturally they all were concentrated. Chicago Likes Its Hockey.

Power Headquarters

T is a far cry from the days when gasoline engines were more of an experiment than a success to the present era of flexible, silent and efficient motors.

The magnitude of the changes and improvements, particularly in the last few years, were undreamed of a short time ago.

During all the developments which have taken place in internal combustion engine designing, the Continental Motors Corporation has been a leader in this far reaching industry. Because of its activities and accomplishments it has been known as "Power Headquarters."

Its organization of trained specialists

in motor building, its vast resources, its unequaled experience, have all played important parts in creating unbounded confidence for its product-Red Seal Continental Motors.

The broadening of its field of usefulness and the unquestioned success of its product as applied to passenger car, truck, bus, marine, airplane or industrial uses has established Continental in a position of supremacy as builders of gasoline motors for every purpose.

SHORTS TAKING PROFITS; MARKET LOOKS BEARISH

BY CHARLES MICHAELS.

Sentiment in the grain trade largely is bearish, with prices down to the lowest of the season. No leader has appeared lately on either side of the markets. The longs are well liquidated and shorts are taking advantage of breaks to take profits in wheat.

In corn, some of the largest shorts everstayed their market. They were covering at around the highest prices of the week on Saturday.

Wheat prices have declined 11c within two weeks and finished Saturday with a net loss of 1%c to \$c. Corn, after a deeline of 31/4 to 31/4c the previous week, advanced to and finished with net gains the week, and rye lost 3c. Speculaon all commodities except coffee and

A world's wheat situation which was regarded as moderately bullish a month or more ago, has become bearish and has had the most to do with the late decline. It is estimated that the world's exportable surplus is in excess of 900,-000,000 bushels with world's import requirements of around 700,000,000 bushels. This is more than estimated early in the season, and has to a considerable ex-tent been the basis for indifference of European buyers in taking supplies

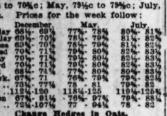

ther than for immediate wants. For the present the trade is confronted with the problem as to how much of the bearishness has been discounted by the decline in prices. While European crops are short Europe either must have a arger wheat acreage for 1927 or be in the same position as at present with no reserves, while the world in general will have reserves larger at the end of this season than for several years. In other words, replenishment of reserves must not be lost sight of while considies in Canada, and generally favorsupplies in Canada, and generally favor-able crop prospects in Argentina and Australia where harvest is earlier than

FIRMS SEEK WAY TO CUT LOSSES

BY CHARLES BARTON.

A new period in fire underwriting, arising from the abnormal losses prevailing since the world war, is discussed by L. C. Wilkes of the Aetna in a recent company bulletin.

Since the world war, Mr. Wilkes points out, premium income has but slowly increased, while fire insurance losses mounted swiftly. Operating expenses have also increased, and as a result of these conditions underwriting profits have been practically wiped

The one thing that has enabled the The one thing that has enabled the fire companies to keep on their feet, he explains, is the fact that during the post war period security market values have continued to-climb. As a result of wise investments the companies managed to increase their assets and applies to the companies of the co surplus, although failing to realize profits on their premium writings.

Leavy leases in burning buildings, olling higher each year, have brought about the elimination of the underwriting profit. Figures for 1926 so far are the highest ever experienced. They in-dicate that the year's total will be much greater than in 1925, when more than \$500,000,000 of property was con-

The Cleveland Terminals Building Company Terminal Tower Building, Cleveland, Ohio

First Mortgage Leasehold Sinking Fund 6% Gold Bonds

THE GUARDIAN TRUST COMPANY, CLEVELAND, OHIO, TRUSTEE

O. P. Van Sweringen, Esq., President of The Cleveland Terminals Building Company, has a

Location: The Terminal Tower Building is being erected on one of the most valuable sites in Cleveland directly ever the concourse of the station of the Cleveland Union Terminal (which Terminal is in course of construction at an estimated cost in excess of \$60,000,000) with a frontage of 243 feet on the Public Square and 302 feet on Prospect Avenue. In the immediate vicinity are the principal office buildings, department stores and banking institutions of the city, with the Hotel Cleveland adjoining the property on the northwest.

The Building: The Cleveland Terminals Building office building with a thirty-eight story tower superimposed thereon making a total height of fifty-two stories rising 708 feet above the street level. It will be of the most modern type of steel and concrete fireproof construction, with granite, Bedford stone and terra cotta exterior. The building was designed by and is being erected under the direction of Messra Caraham, Anderson, Probet and White, of Chicago. It will contain nearly 39,000 square feet of retail store space and about 521,000 square feet of rentable office space, in addition to the necessary ramps and entrances to the Union Terminal Station.

This building will be erected in two units. The construction of the second unit of the building will be commenced as soon as the Ohio Bell Telephone Company, which now occupies a portion of the premises, moves to its new building upon completion.

Security: These bonds will be secured, in the opinion of counsel, by a first mortgage on the leasehold estate in the site comprising 71,527 square feet, and in the building, being erected thereon.

The value of the building, when completed, has been appraised by Messrs. Graham, Anderson, Probst and White, architecta, as being in excess of \$12,100,000. The total authorized issue of \$6,500,000 bonds will, therefore, be outstanding in an amount equal to less than 54% of this appraised valuation. The entire proceeds of the bonds to be presently issued, together with additional cash, will be deposited with The Union Trust Company and The Guardian Trust Company

The balance of \$1,200,000 bonds reserved under this Mortgage will be used to provide, not to exceed 60%, of the cost of construction of the second unit. The proceeds of these reserved bonds, together with approximately \$1,200,000 additional cash, will be deposited and expended as the construction of the second unit of the building progresses, as in the case of the cash deposited to cover the estimated cost of the construction of the first unit.

Control and Management: The new Ceveland Union Terminal Station is now being erected by The Cleveland Union Terminals Company. The stock of this Company is held for the railroads which will be the principal users. The Cleveland Terminals Building Company was organized to develop certain of the property above the Union Terminal Station, and is owned by the Van Sweringen interests.

First and Refunding Mortgage Gold Bonds 5% Series Due (November 1) 1956

Price 97 and Interest Yielding About 5.20%

The company agrees to pay interest without deduction for any normal federal income tax up to 2%.

The following information is taken from official sources.

The company (incorporated in 1912) will own and operate one of the largest transmission systems in the South, extending through an area in Texas as large as the combined areas of New York, Massachusetts, Connecticut and New Jersey. The company will supply electric light and power service to 213 communities, including Waco, Denison, Paris and Sherman. The company will also supply gas to three communities. The total population to be served is estimated at 475,000.

As officially reported for the twelve months ended October 31, 1926, earnings of all properties now owned, including those presently to be acquired, were as follows: Gross earnings, including other income, \$8,378,587; net earnings, \$3,423,030, or more than 2.2 times the annual interest requirements of \$1,550,250 on the mortgage bonds (including this issue). The above earnings reflect practically no benefit from the operation of the large modern Trinidad station placed in operation last July, which should result in substantial economies in operation as well as in increased gross earnings.

These bonds will be secured, in the opinion of Counsel, by a direct First Mortgage on a substantial part of the company's property and by a mortgage on the balance of the property subject to \$15,005,000 First Mortgage Bonds. No additional First Mortgage Bonds can be issued except for pledge under the First and Refunding Mortgage.

The operation of the company's properties is supervised (under the direction and control of the Board of Directors of the company) by Electric Bond and Share Company.

> We recommend these bonds for investment and shall be pleased to send you circulars describing the issue in detail.

GUARANTY TRUST COMPANY OF NEW YORK, TRUSTEE

The following information is summarized from a letter of Mr. J. B. Lockwood, President of the Company.

Properties The General Telephone Company was recently organized under the laws of Delaware to own and operate through sub-sidiary companies, a general telephone business in Michigan and Illinois. It will own all the Common Stock (except directors' qualifying shares) of the Commercial Telephone Company of Illinois, and of the Michigan Home Telephone Company, which will succeed to the business of the United Home Telephone phone Company and the Grand Ledge Telephone Company. The Company's subsidiaries own 21 modern telephone exchange buildings and rent 5 additional buildings, in which exchanges owned by them are operated. Exchanges are located in the cities of Mushesses. of Muskegon, Ludington, Pentwater, Hart, Shelby, Whitehall, Montague, Hesperia, Coopensulle, Raven-na, Conklin, Grand Ledge and Wacousta, Michigan and in Albion, Bridgeport, Clay City, Fairfield, Flat Rock, Flora, Lawrenceville, Mt. Carmel, Olney, Robinson, St. Francisville, Sumner and Wayne City, Illinois. The subsidiary properties also include 555 miles of toll pole line and 4,711 miles of toll line wire serving directly 22,510 stations without competi in over 80 cities and towns in Michigan and Illinois directly and through their own interconnecting rura and toll lines a population estimated in excess of 300,000 people. In addition, 33 independent farmer and mutual companies with 9,500 stations serving a population of 95,000 people are connected with these lines for toll and long distance service.

Equipment at Muskegon, Muskegon Heights, North Muskegon and Pentwater, is of the latest automatic type. Valuable toll lines not only serve the immediate communities, but extend from Muskegon to Grand Rapids and Grand Haven in Michigan, and radiate to important centers from the Illinois properties. Practically all the toll lines in Illinois have been recently rebuilt following the new roads system.

Territory and Business The communities served are highly prosperous, firmly established and well known industrial centers and are growing steadily. Muskegon and environs has a population in excess of 56,000 people and is the home of over 200 well known industrial concerns. The Michigan properties embrace an ex-clusive territory along Lake Michigan from Muskegon to Ludington. Properties in Illinois cover an area approximately one hundred miles square, serving the entire counties of Clay, Crawford, Richland, Lawrence, Wayne, Edwards, Wabash, and in part, White and Jasper counties. All of these properties have been uniformly profitable for many years, and each

year has shown an increase in gross and net income. Rates are much lower than in most other similar communities. The properties are operated without competition under rates fixed by state public utility commissions. Through agreements with the Bell Telephone Companies, the long distance toll lines of the Bell System throughout the United States and Canada, are available for all subscribers.

Security These notes will be secured in the opinion of counsel by deposit of all of the common stocks of the subsidiaries (except directors' qualifying shares). The properties of the subsidiaries have a combined valuation as established by Day & Zimmermann, exceeding \$4,877,119 new and a depreciated valuation of \$4,306,954.

Purpose Proceeds from the sale of these notes will be used to pay in part for the acquisition of securities pledged under this issue and other corporate purposes.

Earnings from the said properties have dou-bled in the last 7 years. About 25% of the gross revenue therefrom is derived from toll bus-ness. Earnings for the 12 months ended June 30, 1926, as audited by Haskins & Sells, were as follows:

Gross income \$651,499.16; operating expenses, including maintenance and general taxes, \$317,865.61. Earnings for the 12 months ended September 30, 1926 (based on audited income as above stated, with application of Company's figures to reflect excess of net earnings for the three months ended September 30, 1926, over those for similar three months in 1925) were as follows:

\$346,787.05

Balance available for depreciation, Pederal Income Taxes and dividends NET EARNINGS APPLICABLE TO INTEREST CHARGES ON THESE NOTES ARE MORE THAN 2% TIMES INTEREST REQUIREMENTS.

The management will remain under the direction of the President and his associates, who have been con-nected with the properties for many years.

serves at the federal banks is \$6 per cent. The ten months' excess of gold mports has been \$78,000,000. Exchange rates as well as the known transfer of arge balances have shown beyond dispute the movement of European capital

in our direction. The three questions which arise on the basis of this situation are, first, why dangerous inflation of credit should not have occurred in the months when trade requirements were at their mini-mum; second, how the extreme autumn money stringency of 1919 and 1920, is to be explained, when the United States was creditor of the outside world as truly as it is today; third, what ought to be the money market's longer future. Conditions Fool Prophets.

Credit inflation in America as a direct and logical result of our accumulating gold reserve, affecting both trade activi-ties and prices of commodities, has been confidently predicted : European econonot been fulfilled. Keynes, the most cocksure of economic prophets, explained that it ought to have come true, but fixing its discount rates, ignores the bilities, but was apparently unaware that reserve bank rates in this period have ruled below, not above, the open market. The reason accepted by practical observers for the absence of the pre-dicted inflation is that American plants' capacity for production and distribution still is far in excess of the consumers

Good Business and GOOD WILL

It is good business when both buyer and seller are pleased.

What service

has this magazine rendered its advertisers and readers to win such Good Will? And how does Good Will concern Good Business?

THE success of Good Housekeeping is due primarily to its women readers.

THEY have looked to this magazine to help them in the progress of their homes. By the aid and inspiration found here their faith has been justified, and Good Housekeeping has succeeded through serving its readers first of all.

YEAR after year American women have conducted their homes and bought the things that go into those homes through their reading of Good Housekeeping.

THEY have personal experience of continuous service. It is their confirmed Good Will that accounts for advertiser's success in Good Housekeeping.

IN order that readers may regard the advertising pages of Good Housekeeping with a

HOUSEKEEPING IS A BUSINESS, TOO

There is no trade or business in the world that is so generally necessary to human happiness as house-keeping.

Good Housekeeping is an essential aid in carrying on an essential business. And the study, preparation, and serving of food is no small part of that business. Here, too, Good Housekeeping renders authoritative and reliable aid.

For every phase of Good Housekeeping—whether it be articles on food, labor saving devices and appliances, fashions, interior decoration, the care of children, or entertaining fiction—contributes effectively to the business of housekeeping.

Good Housekeeping INSTITUTE, Good Housekeeping STUDIO, and Good Housekeeping BUREAU of Foods, Sanitation and Health are parts of an organization that constantly maintain Good Housekeeping's recognized standard of excellence, a standard well known to all who know the magazine.

Thus readers of Good Housekeeping possess every month a complete and reliable plan for operating the business of housekeeping. They carry on this essential business with the guess-work taken out.

confidence equal to that with which they read the editorial pages, every advertisement is guaranteed.

EVERY advertisement is guaranteed because every product advertised has first been investi-

Tommy, aged 5, had been playing hard all afternoon with his neighbor, and, immediately after supper, started off again in the same direction. His mother, remonstrating, said,
"Tommy, you must stay home this
evening, you've been gone all day."
Like 4 flash came the answer from
Tommy, "Aw, mother, didn't you see
enulf of me when I was a baby?" M. B. W.

to the tall, full figure wearing it. The smart afternoon frock we are

showing today reveals a most effective use of this same idea. Executed in blue crêpe satin, with the lustrous side out, the dress eschews all ornamentation and confines its talent to clever draping. This consists of a decided blousing at the hips, a floating panel from each shoulder in the back caught up at the waist, and a full draping at the side finished with a large bow of self material at one hip. Indeed, one observes many simple velvet and crêpe frocks with side draping just letting themselves go when it comes to that smashing self-material bow posed on New York exclusively for THE CHICAGO DAILY TRIBUNE.

Side Trimming Is No Side Issue of the Mode

NEW YORK .- [Special Correspond ence.]-At fashion's game this season we prefer the side lines. For most of the interest of our frocks gathers there. Side trimming is accented for every type of costume, from sports clothes to evening dresses, and takes the form of strips of embroidery, tucked panels, plaits or jabots. Side draping is equally emphasized for

Two frocks at a recent dinner dance Mustrate this dominant tendency. One was a Patou model in georgette treated so simply as to place its entire accent on the brilliantly embroidered jabot depending from one shoulder. It is the juice of the onion that has the odor, and if this does not touch the hands they will not be offensive for hours after the soft and delicious buttered onions have been enjoyed. It is entirely possible to peel onions, and even to cut them fine, without getting oniony hands. But if the cut parts are touched with the fingers they will retain the odor.

It is possible to rub off the skin of a dry and well stored yellow onion en-tirely in some cases without scenting the hands. When it is necessary to do any cutting keep the knife well wet in cold water and hold the onion between the thumb and finger, not touching the cut part. If onlons are to be boiled it is never wise to cut off much of the top and bottom, since they more readily cook to pieces if this is done, and if the bottom is well brushed you can get on without cutting off any, especially the without cutting off any, especially the bottoms of white onions, which parts will drop out when they have been

In the name of all that's good and beautiful, let the skirts come a few who ever told you that protrpding knee joints were being worn this year? They're not—by smart women. You've terribly misinformed on the chic

idea that you're there with the last word in skirt lengths, because they ust escape the knees. saw a good many of the autumn showings in Paris, recently, and never single knee joint offended the eye. Skirts are short, very short-but decently short. And don't you forget that no woman, no matter how much money she puts into her wardrobe, ever attained the distinction of being

smartly dressed who displays a note of vulgarity in her whole makeup, irene Bordoni, who came back later thin I and consequently bearing still fresher news from the style center of the world, said the French women indignantly refute the charge that their knees are shown in profile. They are shocked, in fact, that American girls uld be so gauche as to wear skirts vomen of the boulevards, adept in the psychology of what lures the male, ald not make the error of parading

I walked uptown the other day and vas honestly startled at the interpretation put upon the abbreviated skirt. A curious bit of female psychology not understandable is that it is always the girl or woman who shouldn't who dares the daringest. Why is it? Why does a skinny legged young ton shows dimples, insist upon uncovering the deficit in physical charm? The business of making yourself more attractive involves as a first princi-ble a covering up of the liabilities,

This proved to be a most embarras ing moment for me. I had five minutes to get on a train, stopped in the station to buy a paper, handed the man a dime, grabbed the paper, and hurried away. The man called me back, saying Here's your change, lady." I put the paper down on the stand, took the hange and put it in my purse, closed the purse, and hurried away.

Again the man called me back, this time laughingly, and said, "Don't you want your paper?"

I took the paper, already a little emparation of the third time humans and end for the third time humans.
